

2005 Faculty Climate Survey

Monday, October 17, 2005: 11:24 AM.

The 2005 Faculty Climate Survey identified the following concerns as the most acute among faculty members (the mean, from a scale of 1 to 5, is shown in parentheses for each): **Workload** (1.85), **Rank and Tenure Procedures** (2.08), **Research and Scholarship** (2.2), **Shared Governance/Provost** (2.3), **Adequate Compensation** (2.44). Before we publish the final version of our survey, we would like to solicit recommendations from the faculty concerning possible remedies. These will be discussed in the senate and included in our report. We need your input!
